

**Subject: Safety Procedures and Issues**

Aim	Resources	Time Allotted
To discuss flight safety methods, standardize safety briefings, review the contents of the survival equipment onboard the aircraft, and provide a venue to discuss post-season incidents and issues.	<ul style="list-style-type: none"> <li>- Projector</li> <li>- GLP 006 Slide Package</li> <li>- Opened survival kit</li> </ul>	30 minutes

**Teaching Points**

1. Aircraft handover procedures.
  - power assurance
  - topping checks
  - review of previous snags
  - aircraft walkaround
  - publications checklist
  - clean aircraft prior to handover
2. Documentation of aircraft snags and unservicabilities.
3. Fatigue / hunger.
4. Weather decisions.
5. NOTAMs.
6. Access to AIP.
7. ELT operation.
8. Reporting of Flight Safety concerns.
9. Survival kit / first aid kit contents.
10. Fire extinguisher use.
11. Personal survival / safety equipment.
  - refueling gloves
  - work gloves
  - NOMEX flying gloves
  - insect nets
  - dual layer for NOMEX flight suits
  - proper fit of flight helmets
  - compass
  - signaling equipment

12. Refueling procedures:
  - hot refueling
  - drum refueling
  - lightning concerns
13. Passenger briefings.
  - standard
  - handicapped passengers
  - medical emergency
13. Introduction to Campbell Helicopters Safety Management System.

**Exam** – Indoctrination / General Exam
